Motorized Obsessions - Paul R. Josephson - 2007-08-22

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the

political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Cruising Under Power - Pacific Coasts of Mexico and Central America - Ken Williams - 2008-05

Are you planning to cruise the Pacific Coast of Mexico or Central America? Are you buying a trawler and confused about how to equip the boat? Have you wondered what it is like to retire and spend months living on a trawler? Composited from the cruising blogs of the author, while cruising from San Diego to Costa Rica, this book is far more than a travelogue. The author has dedicated himself to spreading his passion about long-distance cruising and exploration. The Pacific coast, with its' beautiful beaches and resorts, provides an entertaining background as he describes the equipment and techniques he employs for successful passage making. You will be amused and educated as he holds nothing back, while describing his experiences with flopper stoppers, surfing sand bars, anchoring in "unusual" conditions, fishing, greedy foreign officials, jungle cruises, pirates, groundings, high winds, stubborn currents, mechanical failures, mechanical successes and more!
